

# How To...

# Support Attention & Listening

Think about the child's  
positioning in the classroom

They may find it easier to  
be closer to the teacher

Remove distractions

Ensure the child is  
physically  
comfortable

Use the child's  
name and wait for  
their attention before  
giving an instruction

Give specific feedback and  
praise to a child...

"Well done for listening, I  
can tell you were listening  
as you were looking at me"

Provide regular breaks to  
support children to  
maintain their attention
